

# **SAFE SCHOOLS** PROGRAM

# Safe schools, healthy people

When your staff and students are confronted with a disease such as COVID-19, SARS, MERS or others, there is always a need to ensure a safe environment. Failing to reduce the risk of disease may result in loss of business, risk to your brand value, reduced workforce efficiency and even lives. During an outbreak there are a number of things that can be done to help prevent spreading disease. Key areas and touchpoints as well as high risk areas need more frequent attention. Cleaning and sanitation are essential building blocks to infection prevention and outbreak control. In all areas that you clean, disinfect and sanitize, pay attention to standard operating procedures, using recommended products only. Specific attention should be paid to hand hygiene and frequently-touched hard surfaces to avoid cross-contamination.

## Key Touchpoints for Schools:

- Athletic Equipment
- Benches and Chairs
- Railings
- Copier/Printers
- Computers
- Phones
- Desks and Tables
- Locker Exteriors
- Toilets and Sinks

# How to prevent spreading

## How can you control infections?

Infections can be prevented or controlled by reducing the opportunities for infection transmission. This is achieved by adopting basic infection control practices.

## Basic infection control practice

Good infection control begins with assuming everyone is potentially infectious and following proper procedures at all times.

## Hand hygiene

Effective hand hygiene is the greatest single measure that you can take to prevent the spread of pathogens. When below situations occur please perform approved methods to ensure excellent hand hygiene when you:

- Can see your hands are dirty
- Have just used the toilet
- Are about to prepare food
- Have just completed a daily task (such as emptying trash)
- Sneezed in your hands

Methods for correct hand hygiene for hand washing and hand rubbing can be viewed at the end of this document.

# Cleaning frequently-touched surfaces to reduce risk

## Cleaning and sanitation

Cleaning and sanitation will reduce the risk of an outbreak. Clean all areas frequently following your standard operating procedures.

## High risk areas

High risk infection areas need to be cleaned and disinfected on a regular basis to create protection against pathogen spread. Certain conditions allow pathogens to spread easier from one individual to another. These include areas where traffic is high, bodily spills are frequent or where there is a general low level of hygiene.

- **Maintain excellent hand hygiene**
- **Use a disinfectant for targeted disinfection of frequently touched surfaces**
- **Deal with blood or other bodily fluid spillages immediately**

## Key touchpoints

- 1 Classroom Areas**
- Phones, computers and electronics
  - Desks, tables and chairs
  - Light switches and door handles
  - Pencil sharpener and shared surfaces

- 2 Restroom Areas**
- Door and bathroom stall handles
  - Dispensers and hand dryers
  - Light switches and door handles
  - Toilet seats, urinal and toilet flush handles
  - Faucet, sink handles and countertops
  - Splash walls

- 3 Athletic Facilities**
- Light switches and door handles
  - Dispensers
  - Food contact surfaces
  - Shower, toilet and sink areas
  - Lockers, benches and hard surfaces
  - Athletic equipment

- 4 Kitchen and Cafeteria**
- Light switches and door handles
  - Dispensers
  - Cash registers and touch screens
  - Hand and food contact areas
  - Countertops, tables and chairs
  - Sneeze guards

- 5 Office and Conference Areas**
- Phones, computers and electronics
  - Desks, tables and chairs
  - Light switches and door handles

# Cleaning essential areas

## Apply correct hand hygiene methods

**Hand washing:** To wash your hands effectively, wet them, apply soap, lather fully and rub your hands together for at least 20 seconds. Then rinse all the soap off and dry them fully with a paper towel.

**Hand rubbing:** To sanitize your hands apply 3ml of approved hand rub and rub them for 30 seconds. Do not rinse or dry the hands, the hand rub will evaporate.

Handwashing charts may be found at [www.uschemical.com](http://www.uschemical.com)

## Cleaning and disinfection of hard surfaces during outbreaks

Please use your standard procedures, otherwise follow these generic guidelines. **Use approved products with the correct dosing for disinfection of hard surfaces!**

1. Pre-soak a disposable cloth with cleaner or disinfectant and remove gross soil (if necessary), then place in plastic bag for disposal.
2. Clean surface with a disposable cloth pre-soaked with a cleaner or disinfectant, then dispose in a plastic bag.
3. Spray the disinfectant liberally onto surface and spread with a disposable cloth making sure entire surface is wet. Dispose of cloth into a plastic bag.
4. Allow the disinfectant to remain on surface for the necessary contact time. Rinse if required. Always follow Directions for Use on product container.
5. All soiled materials and protective clothing must be deposited into a yellow clinical waste bag and disposed as contaminated material, if possible.
6. Wash hands thoroughly for at least 20 seconds using hand soap.

## Cleaning up blood and body spillages

Please use your standard procedures. If absent, use this as general advice instead.

### Blood or other body fluids (BBF) exposure guidelines:

1. Assess the size of the spill and determine whether to treat as a large spill or a small spill.
2. Perform hand hygiene and put on appropriate Personal Protective Equipment (PPE) to prevent bloodborne pathogen exposure during decontamination, including disposable latex, vinyl, or nitrile gloves, fluid resistant gowns with sleeves, face masks and eye covering (goggles or face shield).
3. Note that for certain disinfectants or if there is a risk of splashing during the cleanup, additional PPE may be required. Refer to the SDS for the disinfectant for additional information.
4. Perform the following procedures for small spill or large spill surface decontamination.
5. Remove PPE, dispose of PPE appropriately, and perform hand hygiene.

### Directions for cleaning spills:

1. Wipe up a small BBF spill with paper towel or similar disposable absorbent material. For large spills, absorb and/or wipe up BBF or other organic material with paper towels, absorbent granules, or similar material. Discard in red bag (bio-hazard) trash.
2. Clean the surface using an appropriate cleaner or cleaner/disinfectant to remove all of the gross soil and any BBF residues. Cleaning cloths used in BBF decontamination should be treated as contaminated and laundered or disposed of appropriately.
3. Disinfect the surface with a registered disinfectant that contains a blood-borne pathogen claim and apply according to the directions on the label. Ensure surfaces stay wet for the contact time of the disinfectant, reapplying the disinfectant if needed to keep the surface wet for the full contact time. Cleaning cloths used in BBF decontamination should be treated as contaminated and laundered or disposed of appropriately.
4. Once the contact time of the disinfectant has lapsed and the surface has air dried, the surface can be returned to normal use. Always follow Directions for Use on product container.

## HAND CARE

### Fusion Foaming Hand Soap, Pear Scent **CWD# 92504 (4/850 ML)**

Foaming Pear Hand Soap is an excellent gentle hand soap. It contains aloe and leaves hands clean and soft.

### Foaming Hand Sanitizer, Mild Lemon Scent **CWD# 92506 (4/850 ML)**

Foaming Hand Sanitizer made with premium 70% ethyl alcohol and offers a liquid formula that is dispensed as a gel. The gel is built with moisturizers to keep hands feeling soft while eliminating 99.9% of common germs.

### Fusion Foaming Antibacterial Hand Soap, Mild Floral Scent **CWD# 92505 (4/850 ML)**

Foaming Antibacterial Hand Soap is made with .13% Benzalkonium Chloride. Our mild and gentle formula is built with moisturizers to keep hands feeling soft while helping eliminate bacteria and viruses.

## FLOOR CARE

### Interplex 25 High Solids Floor Finish **CWD# 90245 (5 GL Pail)**

Is a state-of-the-art thermoplastic finish that combines the ultimate in toughness with a crystal clear "wet look" gloss in a labor saving, high solids formula. Excellent leveling that dries tough, yet flexible. Easily maintained to an extended service life. Low odor and is pleasant to use.

### Turquoise 4 Neutral Cleaner and Disinfectant **CWD# 90260 (4/1 GL)**

Turquoise 4 is a one-step neutral cleaner and disinfectant for hard surfaces and floors. It kills the coronavirus that causes COVID-19. It is effective against a broad spectrum of bacteria, is virucidal, fungicidal, and inhibits the growth of mold, mildew and their odors, use as directed.

### Eraser High Alkaline Stripper **CWD# 90244 (4/1 GL)**

Eraser is a super strength stripper that completely removes the toughest finish buildups – fast! Combining alkaline strength with solvent power, this product strips away multiple layers of "burnished in" finish that can take ordinary strippers several applications to remove.

### Fusion Enzyme Floor & Tile Degreaser **CWD# 90019 (2/1 GL)**

Fusion Enzyme Floor & Tile Degreaser is a new generation foaming cleaner and degreaser specifically designed for use on quarry tile floors. It deploys bioactive enzymes to digest oils and food soils without the use of harsh caustic chemicals. Daily use helps reduce slips and falls.

# HOUSEKEEPING

## Blue Planet Disinfectant & No Rinse Sanitizer

**CWD# 90105 (6/32 oz)**

**CWD# 90262 (4/1 GL)**

Blue Planet Disinfectant is a broad-spectrum hospital-grade bactericidal, virucidal, and fungicidal disinfectant and hard, nonporous food contact surface sanitizer made from simple ingredients. It is safe to use on hard surfaces and has an 18 month shelf life.

## RTG Foaming Tub & Tile Cleaner

**CWD# 90211 (6/34 oz)**

Foaming Tub & Tile Cleaner is a powerful, yet mild, porcelain or hard surface, shower, tub and tile cleaner. It eliminates soap scum, lime scale, calcium and more. It's high clinging formula allows the foam to cling to vertical surfaces for longer contact and activity on soils, rendering clean surfaces.

## Fusion Blue Elite Pot & Pan Detergent

**CWD# 90017 (6/32 oz)**

**CWD# 90016 (4/1 GL)**

Highly effective concentrated premium hand dish detergent that produces rich "grease-eating" suds that quickly cut through food soils. Includes suspending agents to keep grease and soils from redepositing on dishes, as well as lanolin to leave hands soft.

## Fusion Clinging Toilet Bowl Cleaner

**CWD# 90115 (12/32 oz)**

Clinging Toilet Bowl Cleaner is a cherry scented, hydrochloric acid toilet bowl and restroom cleaner that is highly effective for removing heavy stains, soil, rust, scale, soap scum and hard water encrustations. In toilet bowls, urinals, shower stalls and other areas where these soils occur.

## RTG Citrus Degreaser

**CWD# 90116 (6/34 oz)**

RTG Citrus Degreaser is a citrus based degreaser that is best used for general cleaning and other hard surfaces. This formula will effectively remove grease, dirt, oils, and grime while leaving behind a pleasant citrus scent.

**CASH-WA DISTRIBUTING**
