**USDA Buy American Provision – Quaker®/Pearl Milling Company™/Near East® Products**

The Richard B. Russell National School Lunch Act (“NSLA”) contains a “Buy American” provision (Section 12(n)) essentially requiring that school food authorities (“SFAs”) purchase domestically grown and processed food products. The NSLA defines a “domestic” commodity or product as one that is produced and processed in the United States and substantially uses agricultural commodities that are also produced in the United States. USDA further relies on one of the reports accompanying the legislation to interpret the term “substantially,” as used above, to require that over 51% of the final processed product consists of agricultural commodities that were grown domestically.

There are two exceptions to the Buy America provision that allow for the purchase of products that do not meet the provision’s definition of a domestic product: 1) the product is not produced or manufactured in the U.S. in sufficient and reasonably available quantities of a satisfactory quality; or 2) competitive bids reveal the costs of a U.S. product are significantly higher than the non-domestic products.

**As of the date set forth above, the products listed directly below are processed in our domestic facilities and have at least 51% U.S. content, and therefore qualify under the Richard B. Russell B. National School Lunch Act’s Buy American provision for purchasing food and food products used in the Child Nutrition Programs.**
